# 松野屋は探し歩いています

Matsunoya is always looking for the latest in retro...

松野屋は 1945 年創業、現在は自然素材を中心とした生活道具をあつかう荒物問屋。荒物という言葉自体、近ごろあまり耳にしなくなったが、ほうき、ちりとり、ざるなど、ちょっと前まではどこにでもあった簡単なつくりの日用品のこと。松野屋では、国内やアジアの町に直接足をはこび、町工場や閑散期の農家などで作られる日用品などを仕入れると同時に、生産者とともに今の時代のニーズにあったオリジナル商品を開発してきた。荒物は民藝と同じように人の手が生み出す日用品のことだが、それは民藝のいうところの「民衆的手工藝品」ではなく、より普通の人びとの日常の暮らしに根差した「民衆的手工業」から生まれる日用の道具たちだ。人として、まっとうな暮らしを営むなかで、長い年月をかけて培われてきた手工業製品には、買いややすい値段で、良い仕事をするものが多い。日常に使いやすく、今の暮らしにちょうど良い、「ベストでもベターでもない、ナイスなものづくり」から生まれる暮らしの道具たちとの出会いが、日々の生活を豊かに彩ってくれることを願っている。

Matsunoya, founded in 1945, is an aramono wholesaler dealing in daily tools made of natural materials. Aramono – miscellaneous daily items – is itself rarely heard these days. It includes brooms, dustpans, and sieves – the simple daily tools found in most homes just a few decades ago. Matsunoya staff visit local plants throughout Japan and Asia to purchase these items from small factories and off-season at farms. Working together with producers, we also develop original items meeting the needs of the age. Aramono and other daily goods include industrial handicrafts – not current “folk art” handicrafts. The original daily industrial handicrafts grew out of years of ordinary people making an honest living from practical goods at reasonable prices. We encourage our users to enjoy life more by using honest quality items for a more humanistic and natural lifestyle.

# Information

## | About products |

Some of our products are made by limited numbers of artisans and factories. Due to the condition, there may be a delay or out of production.

## | Shipping |

Shipping charge is added, and it is estimated after receiving order.  
(In general, EXW)

Items are sent with your preferred shipping method after completion of payment.

## | Payment |

The payment term is 100% prepayment when you order.  
A bank transaction fee is the responsibility of the customer.

## | Replacement |

After receiving items, please check them immediately.  
We accept the claim for 10 days after receiving items and only defective items can be replaced.

# 「Note」

Please read before your order

- Information on this catalog (Vol.17) is valid for a year from September 2025.
- We appreciate your understanding for the followings:
  - There may be changes of price and/or specification for amelioration of items even during the above period.
  - Colors on items may be slightly different on this catalog due to printing.
  - Hand-made crafts may differ slightly in their sizes and forms from this catalog.
  - Please allow some situations that items with natural materials may get moldy or moth holes by humidity and may cause cracks by dryness.
  - There may be lack or out of order of items depending on timing of your order.
- Please ask any questions about your inquiry concerning our products.

The front has three gathered pockets for bottles, umbrellas, etc. There are also three flat pockets on the back and a small pocket on the inside for a smartphone, pens, etc. The mouth of the main body has a metal triangle and a scissors fastener to prevent the mouth from opening too wide. The bottom part is double-layered and sturdy.

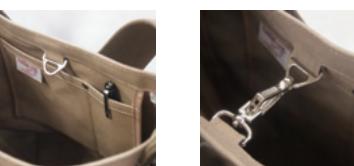

Please note that size may vary due to the production process.

Very durable one-piece strap rucksack. It can stand for hard locations such as rocky areas. Matsunoya produced this rucksack with domestic No.6 cotton and leather.

The more you use, the better texture becomes. It can be easily opened and closed with a metal closure for the front strap.

New belt comes with it in case it gets old.

◆Notice about Japanese colander・basket◆ [17page-21page]

- Since this item is made of natural material, there may be cases of deformation of color and form, change of its size, depending on arrival timing of items.
- Natural Material may remain some cracks and/or splinters. They are not defective items.
- Store bamboo items with care, since they may crack with dryness and may get moldy with moisture.

※Approximate size and weight

Color schemes may vary depending on the time of arrival.

テレビドラマの『おしん』でおしんが使われていたかごに似ている事から名付けたと由来のあるおしんかご。雪の重みに耐えて育ち、強さを増したしなやかな根曲竹を使用しています。シンプルな作りながら、通気性のよい、涼しげな雰囲気を味わえる六つ目編みが特徴です。通気性を活かし、根菜や食料品のストックに便利です。玄関先ならば、スリッパ入れとしてもおすすめです。

# Tohoku Crochet (Tono city, Iwate Prefecture)

Photos by: Tohoku Crochet Village

Long time ago in Tohoku region, each family used to keep sheep and had knitted with their yarns during long winter season. After an earthquake disaster in 2011, many people in the area lost energies to live. Under the hard situation, diversities of volunteer works as support were introduced to local people to energize them. One of them was a knitting work. The knitting activity started becoming not only support but an actual work for them. These products are collaborative and supportive works between Tohoku Crochet Village and Matsunoya.

※660g

Nepal

Material : Galvanized iron

There are holes in the bottom of the bucket for air passage. When using the bucket, prepare about two bricks or blocks and place them with space between them. Place the bucket on top of the bricks or blocks to allow air to pass through easily. Please be sure to use it outdoors and handle fire with care.

Japan

When dry, it is hard and stiff to the touch, but when wetted and wrung out, it softens and becomes gentle and pleasant to the touch. It can be used for washing dishes and for body use. Massaging the whole body with body soap on it improves blood circulation and firms up the skin.  
It is also recommended for elbows and knees where keratin is a concern.

# Khadi cotton cloth

WomenWeave is an organization to support Indian women's independence by establishing "hand-weave" as job. The hand-weave is one of traditional hand work for women in India. Khadi cotton was created during the colonial Period by Britain. It is said that Gandhi spread the handwoven cotton cloth for Indian's independence against machine weaving by industrial revolution. Khadi cotton keeps containing air. The more it is used, the more smooth it becomes. There are two different sizes, so they can be used for each purpose.

※360×710mm  
※60g  
India

The small size can be used around the kitchen as a cloth, or as a handkerchief or luncheon mat. The large size is recommended as a towel. The softness of the towel allows it to gently conform to the skin when washing the body. It can be carried compactly and dries quickly, so it can be used as a substitute for a travel towel. It can be laid on a shelf, cover a basket, or serve as an interior decoration.

# Matsunoya Aramono Tenugui wash cloth vol. I

This Tenugui, an eraser stamp is carved from a picture drawn, and a plate is made based on the stamped picture. These are dyed using a traditional technique called "Chusen," and the gradation is attractive.

The patterns are lined with Matsunoya's standard products and are pretty no matter which side is facing out.  
The patterns are arranged in such a way that they can be seen well when made into azuma-bukuro, so please try your hand at making azuma-bukuro as well.

Fine teeth bamboo scraper  
おろし金スクレーパー<sup>スリッパー</sup>  
※25×130mm  
※10g  
Japan(Kagoshima)

This scraper is made of madake bamboo from Kagoshima Prefecture. The thinly split tips, shaved to an exquisite thickness, are supple and firm, and clean off ginger, wasabi, yuzu peel, etc. that are stuck in the grater's teeth. It is also useful for sprinkling condiments directly onto dishes. It is also useful for cleaning the mortar.

Japan(Shimane)

## Iwami Mortar

When using, wet a dish towel, squeeze it tightly, and place it under the mortar. It will prevent it from slipping. After use, scrub the grooves with a scrubber and dry well before storing.

This wooden pestle is made from Prickly Ash trees collected at the foot of Mount Kirishima. Prickly Ash has long been used for wooden pestle because it is hard and resistant to abrasion, and is also said to have antibacterial properties. Please use for grind sesame or nuts.

Caution for Wood paper food wrap	IH	Dishwasher	Direct heat	Microwave
	x	x	x	x

\* It tends to split lengthwise when dried. Wet the product lightly before use.

\* It absorbs moisture and oil.

Paper-thin sheen of wood used as wood paper food wrap is made of conifer. It was started to be used as a paper to write down Buddhist sutra and has changed the way to use it over time, such as wrapping portable food or preserving fish and meat. Wood paper food wrap can absorb moderate amount of moisture just like rice chest, so it can keep food like onigiri (rice ball) in a good condition. It can be also used on the bottom of lunch box to absorb liquid. This product shows excellent permeability, antibacterial effect and prevent food spoilage. Fragrant coniferous tree from Hokkaido is used as its material.

 ※Φ180×H150mm  
 ※260g  
 China

It is very useful for steamed dishes such as xiaolongbao, steamed meat buns, shaomai, and steamed vegetables. Steaming vegetables in a Cedar steamer does not make them watery, and they taste good even when cold. Frozen small basket pastries can also be heated in the Cedar steamer, making them firmer than in a microwave oven. It is also convenient to use one level for cooking small quantities. If you put the whole Cedar steamer on the dining table, the atmosphere will be more lively and the dining table will be more lively! It fits perfectly in the Wooden lid small pot (20-1606), so we recommend using them as a set!

 Japan(Kagoshima)

The grooves on the tip make it easy to grab things. The ice tongs, as the name suggests, are easy to grip ice, and are useful not only for situations where ice is used, such as at the drinking table, but also for serving salads and other dishes. The mini tongs are just the right size for pickles and seasonings. The simple design looks great on the dining table.

## ※Approximate size and weight

Aluminum tea stools are common in Korea.  
The traditional wooden furniture called "Ri-cho-zen"  
was made of aluminum, which is easy to handle, and it  
became widely popular among the general public. It can  
also be used as a tray by folding the legs. It is  
lightweight and easy to carry, so it can be used for  
camping, barbecues, and other outdoor activities.

It can stacking.

Double structured stainless steel  
which keeps cold and heat inside of  
the cup makes it easy to hold.

Bowls and small bowl with lid are vessels that  
easily fit in with everyday dining. Bowls can be  
used for cold noodles and salads. The small bowl  
with lid can be used as a receptacle for butter or  
jam, or as a container for seasonings. It can also  
be used for accessories or stationery containers.

## Waxed Paper Bag 蝋引紙袋

The Waxed paper bag series have been produced in a small factory since 1945. They are very safe which can be for wrapping foods. The bags have been used for long time at fish stores, vegetable stores and etc because they are water resistance, durable and porous. All of materials for the bags, such as glue, paper and wax, passed a specification test as wraping paper for foods.

Due to unstable stock status, the product may be out of stock for a long period of time.

## Japanese glass bottle

Japanese glass bottle has been produced as dental glass bin in Tokyo since about 100 years ago. Each piece is made by pouring glass into mold by skilled craftsmen. Since a spout of the bin is carefully polished by industrial diamond, it can be sealed by a lid very well and does not leak any liquid.

It is also recommended to use it to hold ink or gel nail polish.

◆Notice about foreign basket◆ [52page-61page]

- Arrival date is not stable because of hand-made products.
- There may be slight differences in color, form and size because of natural materials.
- Nature of the materials may leave darkened spot, crack, sprinter and etc. They are not defective items.
- Basket handle may have some stains and smells because of the materials.
- Please do not leave basket under high-temperature and humidity, ideal for well-ventilated locations.
- Scrubber and brush may be used for cleaning. Dry out well in case of wet.

## ※Approximate size and weight

• Arrival date is not stable because of hand-made products.

Lao baskets are woven in a small village about a three-hour drive north of Vientiane, the capital of Laos. Here and there in the village, you can see people chatting while making bamboo ladders, or weaving baskets in the shade of trees while swinging in hammocks. The green bamboo, which is similar to madake in Japan, is woven by slicing the bark as thin as possible with a knife and soaking it in water. The way the bamboo is formed from a flat surface into a three-dimensional shape is similar to the way that Iwate's Sasazutake (bamboo shoots) are used to make Bamboo clothes storage box baskets. The very light and supple woven baskets give a nostalgic impression and fit easily into Japanese life.

※1510g  
Japan(Aichi)

It is useful both indoors and outdoors. It fits perfectly in the Heavy Canvas Tote XL, so we recommend using it as a set.

A wooden folding chair made at a woodworking shop in Aichi Prefecture. Hang it over two pieces for compact storage. The main body is plain European beech wood. The seat is made of durable domestic thick No. 8 canvas. The bolts and nuts are made of rust-resistant stainless steel and are extremely durable.

The rustic texture and fresh scent of natural materials are appealing. It has excellent air permeability and does not get stuffy, so your feet will be comfortable. It is tightly woven and sturdy, so it can be used not only in your room but also at the entrance or on the balcony. It is also perfect for picnics, cherry blossom viewing, and other outdoor activities. It is also recommended for drying vegetables.
